//done lib="AFF024-subtracted library"
//note="Organ: Fetal Liver; Vector: Sport 1; Site_1: Sal 1;
Site_2: Not 1; Two directionally cloned cDNA libraries
were made from a mematopoietic stem cell-supporting
stromal cell line (AFT024) and from a non-supporting
stromal cell line (AFT024) and from a non-supporting
stromad lell line (2018). Subtractive hybridization was
performed by hybridization of the target, AFT024, single
stranded cDNA library in pSport1 to biotinylated RNA
transcribed from the driver, 2018 cDNA library in pSport2
with inserts cloned in the complementary orientation. The
AFT024-subtracted library contains 4.2x105 clones and is
depleted of common housekeeping gene products eg.
beta-actin and enriched for transcripts specific to
AFT024. For detailed protocols and additional information

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 75,

The present sequence is murine cytokine receptor, Zcytor14. The Zcytor14 polypeptide is useful for identifying or isolating Zcytor14 ligands, in polypeptide is useful for identifying proteins or peptide cleavage sites, in identifying proteins or peptide cleavage sites, or a main acid sequence analysis, and in monitoring biological activities of both the native and tagged protein in vitro or in vivo. Polypeptides having Zcytor14 activity can be used to treat inflammation, such as chaving Zcytor14 activity can be used to treat inflammation, such as the production analysis, molecular biology, protein chemistry and antibody tool in genetics, molecular biology, protein chemistry and antibody production analysis, in the preparation of expression constructs for pacterial, viral or mammalian expression, in determining mRNA and DNA bacterial, viral or mammalian expression, in determining mRNA and DNA cralated polymuclectides by nucleic acid hybridisation, related polymuclectides by nucleic acid hybridisation, in linkage-based testing for various diseases in murine models, and to in linkage-based testing for various diseases in murine models, and to detecting whether a subject's chromosomes contain a mutation in the diagnosis, and for detecting and localising Zcytor14 gene expression in arthritis, and as educational tools or in research. ```
The invention relates to murine cytokine receptor, Zcytor14. The Zcytor14 composition relates to meanifying or isolating Zcytor14 ligands, in polypeptide is useful for identifying proteins or peptide cleavage sites, comparing antibodies, in identifying proteins or peptide cleavage sites, composition acid sequence analysis, and in monitoring biological activities of both the native and tagged protein in vitro or in vivo. Polypeptides of having Zcytor14 activity can be used to treat inflammation, such as rhematoid arthritis. Zcytor14 polymocleotide may be used as educational colorion analysis, in the preparation of expression constructs for production analysis, in the preparation of expression constructs for concursion or Ecytor14 polymucleotide in tissues, for identifying concursion or Ecytor14 polymucleotide by nucleic acid hybridisation, classification of Zcytor14 polymucleotide by nucleic acid hybridisation, contains whether a subject so chromosomes contain a mutation in the datement of the contains and to in linkage-based testing for various diseases in mutation in the datement and for detecting and localising Zcytor14 gene expression in diagnosis, and for detecting and localising Zcytor14 variant, Zcytor14 variant, Zcytor14 variant, Zcytor14 variant, Zcytor14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New murine cytokine receptor, Zcytor14, and polynucleotides encoding the receptor, useful for treating inflammation, specifically rheumatoid arthritis, and as educational tools or in research.

2 ggo Levin SD, Kuestner RE, Billsborough J; Burkhead Jaspers SR, Presnell

New isolated soluble receptor comprises at least one ZcytoR14 subunit, useful for treating an inflammatory disease, e.g. asthma, inflammatory bowel disease, ulcerative colitis, arthritis, atopic dermatitis, or WPI; 2006-067457/07. N-PSDB; AEF05372.

Disclosure; SEQ ID NO 26; 205pp; English.

psoriasis.

The invention describes an isolated soluble receptor comprises at least one ZcytoR14 subunit, where the ZcytoR14 subunit comprises a polypeptide comprising fully defined 432 amino acids (SEQ ID NO. 3) or comprises a mino acid residues 1-427 of a fully defined 67 amino acid sequence (SEQ ID NO. 24) given in the specification. Also described are: an isolated solubble receptor comprising SCYCR14, where ZcytoR14 comprises a polypeptide having SEQ ID NO. 3; and where the aclubble receptor reduces the pro-inflammatory activity of either IL-174 comprising fully defined 153 amino acids (SEQ ID NO. 14) or IL-177 comprising fully defined 153 amino acids (SEQ ID NO. 16); an antibody or antibody fragment that binds to a polypeptide comprising fully defined 692 amino acids (SEQ ID NO. 16); an antibody or antibody fragment ceduces the pro-inflammatory activity of either IL-174 (SEQ ID NO. 16); are centioned to inflammatory activity of either IL-174 (SEQ ID NO. 16); are reducing IL-174-induced or IL-177 (SEQ ID NO. 16); a reducing IL-174 induced or IL-177 (SEQ ID NO. 16); a fillicted with an inflammatory disease in which IL-174 or IL-177 plays a role; and treating a pathological condition in a subject associated with ZcytcR14 activity. The soluble receptor comprising at least one ZcytcR14 substitution for treating an inflammatory disease, e.g. asthma; chronic inflammatory disease selected from inflammatory bowel disease, ulcerative colitis, Crohn's disease, arthritis, atopic dermatitis, or psoriasis; or acute inflammatory disease selected from endotoxemia, septicemia, toxic shock syndrome, or infectious disease. This is the amino acid sequence of a mouse IL-17A and IL-17F receptor zcytoR14

comparising fully defined 432 amino acids (SEQ ID No. 3) or comprises comparising fully defined 432 amino acids (SEQ ID No. 3) or comparison comparison acid sequence (SEQ amino acid residues 1-427 of a fully defined 667 amino acid sequence (SEQ ID No. 24) given in the specification. Also described are: an isolated ID No. 24 given in the specification. Also described are: an isolated collaborated by the soluble receptor comparising ZCYCNII, where the Soluble receptor reduces polypeptide having SEQ ID NO. 3; and where the Soluble receptor reduces polypeptide having SEQ ID NO. 14) or IL-17R comparising fully defined 153 amino acids (SEQ ID NO. 14) or IL-17R comparising fully defined binds amino acids (SEQ ID NO. 16); an antibody or antibody ragment reduces the pro-inflammatory or antibody ragment reduces the pro-inflammatory or antibody ragment reduces the pro-inflammatory collaborated security of either IL-17A (SEQ ID NO. 14) or IL-17R (SEQ ID NO. 15); activity of either IL-17A (SEQ ID NO. 14) or IL-17R plays a creducing IL-17A-induced or IL-17R-induced inflammatory disease in which IL-17A or IL-17R plays a creducing IL-17A-induced or IL-17R-induced inflammatory disease selected from inflammatory boxed disease, conduction in a subject associated with cole; and treating a pathological condition in a subject associated with cole; and treating an inflammatory disease, e.g. asthma; collitae, Crobu's disease, arthritis, at optic dermatitis, or ulcerative collitae, Crobu's disease, arthritis, at optic dermatitis, or ulcerative collitae, Crobu's disease, arthritis, at optic dermatitis, or uncarted soluting and disease selected from inflammatory disease selected from endotoxemia, continent and sequence of a mouse IL-17A and IL-17R receptor zcytoR14 artivity and a mouse IL-17A and IL-17R receptor zcytoR14 artivity and a mouse IL-17A and IL-17R receptor zcytoR14 artivity and a mouse IL-17A and IL-17A and IL-17R in it is the mouse IL-17A and IL-17R and IL-17R in it is a septicemia.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               999
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               540

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The invention relates to primate and rodent DNAX cytokine receptor subunit (DCRS) polypeptides and the polynucleotides encoding them. The receptors, or their portions may be useful as phosphate labelling enzymes to label general or specific substrates. The subunits may also be functional immunogens to elicit recognising antibodies, or antigens capable of binding antibodies. A combination, e.g., including a DCRS can be used as an immunogen for the production of antisera or antibodies A purified and CORS can also be used as a reagent to detect antibodies generated in response to the presence of elevated levels of expression, or immunological disorders which lead to antibody production to the endogenous receptor. This sequence represents the mouse DCRS7 polypeptide
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    120

                                                                 셤
                                                                                                                  The invention relates to modulating (M1) activity of cell, by contacting cell with an agonist or antagonist of DNAX cytokine receptor subunit cell with an agonist or antagonist of DNAX cytokine receptor subunit cell with an agonist or antagonist of DNAX cytokine receptor subunit inflammatory bowel disorder (IDBD) interstitial lung disorder, asthma or allergy, or atherosclerosis. Also provided are methods for treating (M2) the disorders which involves administration of the modulator and diagnosing (M3) a disorder as mentioned above that involves contacting a sample from a test subject with a binding composition that specifically cample from a test subject with a binding composition that specifically binds to a polypeptide or nucleic acid of DCRS9 or IL-17C. (M1) is useful for modulating an activity of a cell. (M2) is useful for treating a subject suffering from a disorder such as portasis, iBD, interstitial ung disorder as idiopathic pulmonary fibrosis, eosinophilic granuloms, or hypersensitivity pneumonitis. The IBD is Crohn's disease or ulcerative colitis. The present sequence represents a mouse DCRS6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         216

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present invention provides the protein and coding sequences of CDNAs isolated from human, murine and rat skin cell libraries. The sequences can be used in the development of therapeutic agents useful in the treatment of skin disease, including skin wounds, cancer, growth defects, developmental defects and inflammatory diseases. The proteins have important roles in the induction of hair growth, cell proliferation and cell-cell interaction, in maintaining tissue integrity, in wound healing and in modulating immune responses. The present sequence is a polypeptide of the invention

The invention relates to an interleukin-17 receptor-like (IL-17RL)

colypeptide, with 85 or greater sequence identity to a polypeptide with
a sequence appearing as AAJ98781-AAJ98722, where IL-17RL binds to an IL-
a sequence depearing as AAJ98781-AAJ98722, where IL-17RL binds to an IL-
IT selected from IL-17A, IL-17B, IL-17C, IL-17R and IL-17F. Also included

care IL-17RL polymucleotides, antibodies, expression cassettes, transgenic
chost cells, a method of determining the aggressiveness of a prostate
cancer cell, by determining the presence or absence in the cell of a
concer cell indicates that the cancer is more aggressive than a like cell in
which the group is present) and a mammalian cell comprising a
colymucleotide encoding an IL-17B antagonist, where the cell is selected
from chondrocyte, synovicotye, and messenchymal stem cell. IL-17RL or polymucleotide is useful for the manufacture of a medicament to responsiveness to a
polymucleotide is useful for the manufacture of a medicament to modulate
cartilage or bone growth in a mammal. The polymucleotide is useful for
the manufacture of a medicament to restore antogen-responsiveness to a
prostate cancer cell. IL-17RL is useful for decreasing catabolic activity
in bone or cartilage in a mammal. IL-17RL is useful for inhibiting
cossification or calcification in a mammal suffering from pathologycan synthesis
cossification or calcification in a mammal suffering from pathologycan
cossification or calcification, for diagnosing a cartilage pathologycan
cossification or calcification, for diagnosing a cartilage pathologycan
cossification or aclcification in a mammal suffering from pathologycan
cossification or calcification for diagnosing a cartilage pathologycan
cossification or calcification for diagnosing a cartilage pathologycan
cossification or calcification for diagnosing a cartilage pathologycan
cossification or calcification for diagnosing a cartilage pathologycan
cossification or calcification for decreasing cartilage pathologycan
cossification or calcificatio
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        120

Zcytor14 gene in a biological sample. Anti-Zcytor14 antibodies can be used to screen biological samples in vitro for the presence of Zcytor14. Proteins, polypeptides and peptides having Zcytor14 activity can be administered to a subject who lacks an adequate amount of this polypeptide, for treating inflammation and conditions such as rheumatoid arthritis. In contrast, Zcytor14 antiagonists (e.g. anti-Zcytor14 antibodies) can be used to treat a subject who produces an excess of Zcytor14. Zcytor14 nucleotide sequences can also be used to provide zcytor14 to a subject. The present sequence represents the human cytokine receptor Zcytor14.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         407

AAE14562 standard; protein; (first entry) 17-MAY-2002 AAE14562 RESULT 10 AAE14562 BXXXE

The invention provides a new human cytokine receptor desinated Zcytor14. Zcytor14 can be expressed by standard recombinant methodology. The encoding nucleic acid is useful for detecting the expression of a

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The invention relates to murine cytokine receptor, Zcytor14. The Zcytor14 polypeptide is useful for identifying or isolating Zcytor14 ligands, in preparing antibodies, in identifying proteins or peptide cleavage sites, in amino acid sequence analysis, and in monitoring biological activities of both the native and tagged protein in vitro or in vivo. Polypeptides having Zcytor14 activity can be used to treat inflammation, such as cheumatoid arthritis. Zcytor14 polynucleotide may be used as educational tool in genetics, molecular biology, protein chemistry and antibody production analysis, in the preparation of expression constructs for bacterial, viral or mammalian expression, in determining mRNA and DNA localisation of Zcytor14 polymucleotide in tissues, for identifying related polynucleotides and polypeptides by nucleic acid hybridisation, in the linkage-based testing for various diseases in murine models, and to determine whether a subject's chromosomes contain a mutation in the Zcytor14 gene. Zcytor14 oligonacionide probes are useful for in vivo diagnosis, and for detecting and localising Zcytor14 gene expression in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  tissue samples. The present sequence is human cytokine receptor, Zcytor14 which can be used to generate humanised variant of murine Zcytor14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            LVPTRLQTELVLRCPQKTDCALRVRVVVHLAVHGHWAEPEE----AGKSDSELQESRNAS 116

                                                                                                      The invention relates to human cytokine receptor Zcytor14 polypeptide and polynuclectide. The Zcytor14 polypeptide, polynuclectide and antibody are useful for treating xeroderma pigmentcoum, Marfan-like connective tissue disorder, cardiomyopathy, diabetes mellitus, Fanconi anaemia, renal cell carcinoma, Marfan syndrome, von Hippel-Lindau syndrome, or blepharophimosis. The present sequence is human cytokine receptor
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    585 RYVGVYFDGILHPDSVPSPFRVAPLFSLPTQLPAFLDALQGGCSTSAGRPADRVERVTQA

The invention describes an isolated soluble receptor comprises at least comprising tuly defined 432 amino acids (SEQ ID NO. 3) or comprises a comprising fully defined 432 amino acids (SEQ ID NO. 3) or comprises a comprising fully defined 432 amino acids sequence (SEQ amino acid sequence (SEQ amino acid sequence (SEQ ID NO. 24) given in the specification. Also described are: an isolated soluble receptor comprises a soluble receptor comprises a soluble receptor comprises a comprise and soluble receptor activity of either II-17A comprising fully defined to a polypeptide comprising fully defined 692 amino acids (SEQ ID NO. 14) or II-17F comprising fully defined 153 comprised (SEQ ID NO. 16); an antibody or antibody fragment that binds and where the antibody or antibody fragment reduces the pro-inflammatory creducing II-17A (SEQ ID NO. 14) or II-17F (SEQ ID NO. 2), and where the antibody or antibody fragment reduces the pro-inflammatory creducing II-17A induced inflammation; treating a mammal creducing II-17A induced or II-17P induced inflammatory disease in which II-17A or II-17F plays a fellicted with an inflammatory disease in which II-17A or II-17F plays a fellicted with an inflammatory disease in which II-17A or II-17F plays a conficuent is useful for treating an inflammatory disease, e.g. asthma; submunit is useful for treating an inflammatory disease, e.g. asthma; cubonit inflammatory disease, arthritis, atopic dermatitis, or cubor syndrome, or infectious disease. This is the septicemia, toxic shock syndrome, or infectious disease. This is the sequence of human II-17A and II-17F receptor zcytoR14.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      New isolated soluble receptor comprises at least one ZcytoR14 subunit, useful for treating an inflammatory disease, e.g. asthma, inflammatory bowel disease, ulcerative colitis, arthritis, atopic dermatitis, or

The intention destribes an isolated subunit comprises a polypeptide comprising fully defined 432 amino acids (SEQ ID NO. 3) or comprises an expression acid residues 1.427 of a fully defined 67 amino acid sequence (SEQ ID NO. 24) given in the specification. Also described are: an isolated soluble receptor comprising ZcytoR14, where ZcytoR14 comprises a combined having SEQ ID NO. 3; and where the soluble receptor reduces the pro-inflammatory activity of either IL-17A comprising fully defined 153 amino acids (SEQ ID NO. 14) or IL-17F comprising fully defined 153 amino acids (SEQ ID NO. 16); an antibody or antibody fragment that binds comprised comprising fully defined 50, and where the antibody or antibody fragment reduces the pro-inflammatory activity of either IL-17A (SEQ ID NO. 14) or IL-17F (SEQ ID NO. 16); and where the antibody or antibody fragment reduces the pro-inflammatory activity of either IL-17A (SEQ ID NO. 14) or IL-17F (SEQ ID NO. 16); and treating a pathological condition in a subject associated with an inflammatory disease in which IL-17A or IL-17F plays a cole; and treating a pathological condition in a subject associated with a crivity. The soluble receptor comprising at least one ZcytoR14 activity. The soluble receptor comprising at least one ZcytoR14 colitis, crohn's disease, arthritis, atopic dermatitis, or septicemia, toxic shock syndrome, or inflammatory disease, arthritis, atopic dermatitis, or septicemia, toxic shock syndrome, or inflammatory disease. This is the amino acid sequence of mouse IL-17A and IL-17F receptor zcytoR14 extracellular ligand-binding domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   61 LVPTRLOTELVLRCPOKTDCALCVRVVVHLAVHGHWAEPEEAGKSDSELQESRNASLQAQ 120

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The invention provides a new human cytokine receptor desinated Zcytor14. Zcytor14 can be expressed by standard recombinant methodology. The encoding nucleic acid is useful for detecting the expression of a Zcytor14 gene in a biological sample. Anti-Zcytor14 antibodies can be used to screen biological samples in vitro for the presence of Zcytor14. Porteins, polypeptides and peptides having Zcytor14 activity can be administered to a subject who lacks an adequate amount of this polypeptide, for treating inflammation and conditions such as rheumatoid arthritis. In contrast, Zcytor14 antagonists (e.g. anti-Zcytor14 arthritis) and antibodies) can be used to treat a subject who produces an excess of Zcytor14 ucleotide sequences can also be used to provide Zcytor14. Zcytor14 nucleotide sequences can also be used to provide Zcytor14 activity can be used to treat a subject who produces an excess of Zcytor14 to a subject. The present sequence represents a chimeric
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    New polypeptide encoding a human cytokine receptor Zcytor14, for treating inflammation e.g. rheumatoid arthritis.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         411

otogelin - mouse
NyAlternate names: mucin-like extracellular matrix protein
C;Species: Mus musculus (house mouse)
C;Species: O3-Dec-1999 #sequence\_revision O3-Dec-1999 #text\_change 31-Dec-2004
C;Accession: T42214
R;Cohen-Salmon, M.; El-Amraoui, A.; Leibovici, M.; Petit, C.

```
hypothetical protein SPBC18H10.20c - fission yeast (Schizosaccharomyces pombe)
Cypothetical protein SPBC18H10.20c - fission yeast (Schizosaccharomyces pombe)
Cypothetical brotein SPBC18H10.20c - fission yeast (Schizosaccharomyces pombe)
Cypothetical Schizosaccharomyces pombe
Cypothetical Schizosaccharomyces pombe
Cypothetical T39784
Rylyne, M.; Rajandream, M.A.; Barrell, B.G.; Badcock, K.; Churcher, C.M.
AyBathatical to the EMBL Data Library, March 1998
AyAccession: T39784
AyAccession: T39784
AyBathatical type: DNA
AyBathatical Profilminary; translated from GB/EMBL/DDBJ
AyMolecule type: DNA
AyBathatical T361 < LYNN
